

**YI@tis-ERP** *the system that takes you to the EU reality.  
The future.*

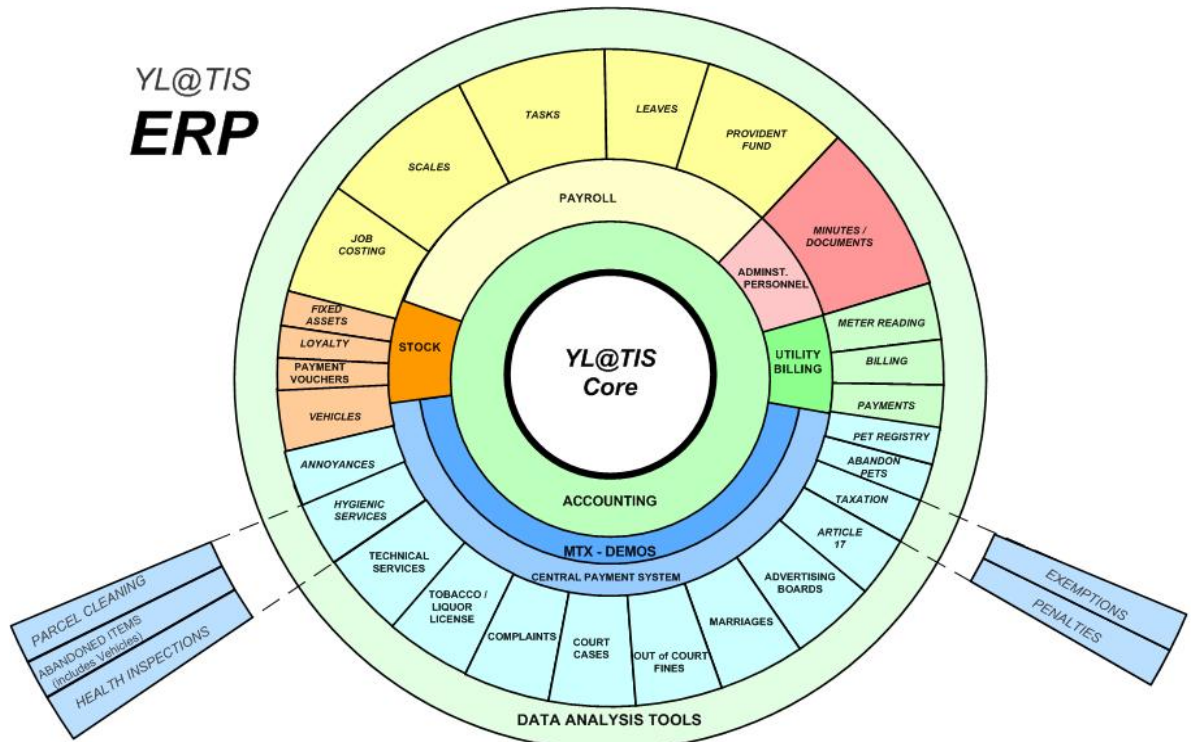

With **YI@tis-ERP** you can administer all aspects of your company from simple tasks to complicate data analysis and budgeting needed for the management of the day-to-day work, as well as the decisions affecting the future of your enterprise.

It is designed for virtually all types of enterprise ranging form small business to large organizations,

covering also Government, Semi-Government organizations and Local Authority needs.

The effectiveness of this system provides you with a vast amount of information at your fingertips under a centralised environment and using the most popular RDBMS and tools of the technology with basic target to serve your enterprise.

**YI@tis-ERP**

**THE SYSTEM**

The system is designed to provide a flexibility that allows it to adapt to the changing needs of a company.

It covers all financial needs of the enterprise as well as special needs depending on the enterprise activities. It gives the opportunity to interface with

ready made routines to GIS, Drawing, CRM and Document Management Systems.

Through a fully normalised database model, targeting to the minimisation of the input and the maximisation of the output, the system is able to produce information for the day-to-day operation but at the same time to analyse data and produce management reporting.

# Discover the Power

## FEATURES

- ◆ Multi Company
- ◆ Multi currency / lingual
